SUMMER 2025

Director's Update

SW WA Academy photos: Coordinator Emily K with Yazmine, a proud academy graduate (top); Instructor Rob McKay with students. PC Kelly Evans, Bethel MS

Sixty-four students explored careers in energy during FWEE's June academies in Centralia, Tri-Cities and Wenatchee - and we expanded the SW WA event from three to five full days of energizing activities and tours (see below).

Big KUDOS to stellar coordinator Emily K. and Centralia High School's talented Rob McKay, who led this year's SW WA Summer Academy in Centralia.

Next up: You'll find us enrolled in NWPPA trainings; attending PNWER and H2 events; supporting 10 CTC faculty to attend GTSE; presenting at *Hydropower for Educators*; planning our virtual Energy Educators meetings (beginning this fall - watch your emails for invitations); and moving to the corner of S. Washington and W. Pear in Centralia. We hope you'll visit us.

There's so much to share. Find us online on FB, Instagram, LinkedIn, and our website - thank you, Emily G for your electrifying work!

~ Monica

SW WA Summer Energy/STEM Career Academy a Huge Success

THANK YOU!

Our career academy students were busy building, exploring, and learning. They climbed a power pole, raced hydrogen cars, saw arc flashes, and met a variety of professionals employed by our partners at SEI; TransAlta; Tacoma Power; Lewis, Cowlitz, and Mason County PUDs; Lewis County Transit; Chehalis-Centralia Airport; and Centralia City

Students toured TransAlta's coal-fired generation plant, Tacoma Power's Mossyrock Dam and Fish Hatchery, and Centralia City Light's Yelm Hydro Project. THANK YOU to everyone involved in making this incredible opportunity happen, and to FWEE for supporting us and tracking all of the behind-the-scenes work. **Coming soon:** FWEE's new activity guide expands to include fusion, h2, pumped storage and more!

SEI Climate Corps Program

A BRIDGE-TO-CAREER FELLOWSHIP PROGRAM

Looking to simultaneously reduce costs, accelerate sustainability initiatives, and develop emerging talent- without the traditional hiring headaches? SEI's **Climate Corps fellowship program** offers a uniquely low-risk, high-impact approach to meeting your sustainability goals while nurturing a Climate Corps Fellow's development and career growth.

Interested in hosting a Climate Corps Fellow or want to learn more?
